# UCC Student Hub

University College Cork, College Road, Co Cork

Featured Products: **Ready-Mixed Concrete, Concrete Blocks and Aggregates**

This project comprised of the construction of a new six storey Student Hub Building within the university campus. The building is used to provide student and administrative services and flexible learning spaces. The works involved demolitions, alterations and extensions to the existing Windle Building, the removal of some existing car parking spaces and new hard and soft landscaping.
