

## case study

### Cooper's Cross

Mayor Street Upper, North Dock, Dublin 1 D01DR94

Featured Products: **EWI (External Walling Insulation), Coloured Masonry Mortar, High Strength Bedding Concrete (HSBC), Priming Slurry, Rapid Set Jointing Mortar and Ready-Mix Concrete**

A landmark six-acre mixed-used campus, Cooper's Cross is an exciting collection of brand new, fully furnished apartments located at the heart of the Dublin Docklands. Comprising of the most intelligent, sustainable Grade-A office and residential accommodation with community green spaces, retail, and a dedicated cultural space, Cooper's Cross is redefining how you can work, live and thrive.

EWI (External Walling Insulation) a process of wrapping your home in insulation and then protecting the insulation with a high quality Silicone Render finish was used throughout this project. Our Bedding and Jointing products, along with our masonry coloured mortar from our KPRO Range, were also used.
