

Case Study

Layer Marney Essex, UK

Contractor: DCE Contractors

Architect: Stanley Bragg

Project Co-Ordinator: Manor Services

Sector: Residential

Region: United Kingdom

Year of Completion: 2026

Kilsaran played a key role in delivering the façade package for this contemporary residential development, providing a complete KPRO rendering solution designed to achieve a clean architectural finish with long-term durability and weather protection. Working closely with the project team, the specification required a high-performance render system capable of delivering consistent aesthetics across multiple dwellings while providing resistance to challenging climate conditions. To meet these requirements, Kilsaran supplied a complete façade build-up comprising of **Super Bond**, **UNO (one coat render) in Ivory and Sandstone**, and **Silicate-Silicone Render S-SR1.5 in Ultra White**.

Our **Super Bond render** was used to create a strong, reliable substrate, ensuring excellent adhesion and a consistent render finish. The façade was finished with our **UNO (one coat render) in Ivory and Sandstone**, delivering a durable, breathable and weather-resistant surface with a warm, natural aesthetic. A final coat of our **Silicate-Silicone Render S-SR1.5 in Ultra White** provided a bright contemporary finish with enhanced water repellency and long-term resistance to dirt and weathering. Together, the KPRO façade system delivered a high-quality, low-maintenance finish that enhances the development's visual appeal while providing lasting performance.

Kilsaran PRODUCTS

KPRO Façades & Mortars:

- Superbond
- Uno: Ivory & Sandstone
- Silicate-Silicone Render S-SR1.5: Ultra White
